

CHEMICAL PHYSICS

Volume 213, number 1,2,3, 15 December 1996

Contents

Time-resolved spectroscopy of wild-type and mutant Green Fluorescent Proteins reveals excited state deprotonation consistent with fluorophore–protein interactions H. Lossau, A. Kummer, R. Heinecke, F. Pöllinger-Dammer, C. Kompa, G. Bieser, T. Jonsson, C.M. Silva, M.M. Yang, D.C. Youvan and M.E. Michel-Beyerle	1
Dynamical symmetry in the vibrational overtone spectrum of monofluoroacetylene (HCCF) E.S. Bernardes, Y.M.M. Hornos and J.E.M. Hornos	17
The ArClF Van der Waals complex as an example of how atoms inside a molecule interact with those outside F.Y. Naumkin	33
Spin–spin interactions in the reduced $[Fe_6S_6]^{5+}$ cluster M. Czerwiński and J. Dąbrowski	45
A method to calculate the probability distribution for systems with large energy barriers O. Engkvist and G. Karlström	63
Preferential solvation study: Solvation of sodium chloride in water–hydroxylamine mixtures S. Vizoso and B.M. Rode	77
Effect of ethanol addition upon the structure and the cooperativity of the water H bond network R. Lamanna and S. Cannistraro	95
Modeling of optical pumping experiments in CO. I. Time-resolved experiments P.I. Porshnev, H.L. Wallaart, M.-Y. Perrin and J.-P. Martin	111
Calculation of magnetizabilities using GIAO current density distributions T.A. Keith	123
Ab initio study of unimolecular pyrolysis mechanisms of dithioformic acid X. Xie, Y. Tao, H. Cao and W. Duang	133
Calculations on ground and excited state potential energy surfaces of floppy free radicals: HC_4H_2 , HC_3NH , and HC_3O H. Wang and A.L. Cooksy	139
The use of locally dense basis sets in correlated NMR chemical shielding calculations D.B. Chesnut and E.F.C. Byrd	153
Correlation effects in the long-range coupling between acetylenic π -electrons in a series of α,ω -diethynyl[n]staffanes ($n = 1–5$) M. Braga	159
Conformational studies of cyclopropylcarbonyl fluoride from temperature dependent FT-IR spectra of xenon solutions J.R. Durig, S. Shen, W. Zhao and L. Zhou	165

(continued on page 3 of cover)

0301-0104(19961215)213:1-3;1-3

Contents

(continued from page 4 of cover)

Conformational studies of propenoyl chloride in liquid xenon from temperature dependent FT-IR spectra J.R. Durig, Y. Li and Y. Jin	181
An ab initio study of the potential energy surface in the S_1 state of 2-hydroxypyridine A.L. Sobolewski and L. Adamowicz	193
Molecular dynamics study of infinitely dilute aqueous solutions of small biological molecules. Calculation of the static and dynamic properties of formaldehyde S. Tolosa and J.A. Sansón	203
Molecular dynamics simulations of water/metal and water/vacuum interfaces with a polarizable water model A. Kohlmeyer, W. Witschel and E. Spohr	211
Exploratory Pariser-Parr-Pople investigation of the static first hyperpolarizability of polymethineimine chains D. Jacquemin, B. Champagne, J.-M. André and B. Kirtman	217
Optically pumped laser emission in K_2 involving rovibrational levels near the $B^1\Pi_u$ state dissociation limit B.K. Clark, J.M. Standard, Z.J. Smolinski, D.P. Ripp and J.R. Fleming	229
On the sampling of microcanonical distribution for rotating triatomic molecules I. Rosenblum, E.I. Dashevskaya, E.E. Nikitin and I. Oref	243
Ab initio calculation of the intermolecular potential energy surface of $(CO_2)_2$ and first applications in simulations of fluid CO_2 M. Welker, G. Steinebrunner, J. Solca and H. Huber	253
Fast translational thermalization of extreme disequilibrium induced by cluster impact T. Raz and R.D. Levine	263
Second harmonic generation in partially ordered media and at interfaces: analysis of dynamical and orientational factors D.L. Andrews and I.D. Hands	277
An IPA procedure for bound-continuum diatomic transition intensities V.S. Ivanov and V.B. Sovkov	295
A critical analysis of the two-dimensional atom ellipsoid model to study rotational collisions J.C. Belchior and J.P. Braga	303
A new method of calculating exponential operators for scattering problems A.V. Storozhev	313
Rotational relaxation of nitrogen in helium A.E. Belikov, R.G. Sharafutdinov and A.V. Storozhev	319
IR induced isomerisation of HDO complexes: a method for the observation of FIR spectra of matrix isolated water complexes A. Engdahl and B. Nelander	333

(continued on preceding page)

Contents

(continued from page 3 of cover)

Vibrational dephasing in bromocyclohexane: how to separate contributions from different mechanisms M. Kolodziejki, G. Waliszewska and H. Abramczyk	341
Influence of pressure on the ferroelectric phase transition in a symmetrical polymerizable diacetylene crystal DNP J. Even, M. Bertault, A. Girard and Y. Délugeard	357
Interatomic potentials for X0 ⁺ and B ³ 1 states of intercombination cadmium line 326.1 nm broadened by Ar pressure G.D. Roston, M.S. Helmi and T. Grycuk	365
Dissociative excitation of CH ₄ by electron impact: Emission cross sections for the fragment species K. Motohashi, H. Soshi, M. Ukai and S. Tsurubuchi	369
Photodissociation dynamics of HN ₃ (DN ₃) + hν → H(D) + N ₃ M. Lock, K.-H. Gericke and F.J. Comes	385
Laser-induced fluorescence excitation spectroscopy of jet-cooled tropolone–carbon monoxide van der Waals complexes H.K. Sinha, V.J. MacKenzie and R.P. Steer	397
The photochemical reaction of excited acetophenone and benzaldehyde in the gas phase Y. Matsushita, Y. Yamaguchi and T. Hikida	413
Exciton scattering, <i>k</i> selection rule, exciton bandwidth in pyrene microcrystallites, and lattice relaxation energy for the origin of V luminescence Y. Oeda, O. Nishi, Y. Matsushima, K. Mizuno, A.H. Matsui, M. Michinomae, M. Takeshima and T. Goto	421
Triplet quantum yield determination by picosecond laser double-pulse fluorescence excitation S. Reindl and A. Penzkofer	429
High-resolution threshold photoelectron spectroscopy of molecular fluorine A.J. Cormack, A.J. Yencha, R.J. Donovan, K.P. Lawley, A. Hopkirk and G.C. King	439
Positronium dynamics in aqueous solutions of ionic surfactants G. Consolati and F. Quasso	449
Influence of the molecular environment on the hyperfine interaction of ¹¹¹ Cd ions in gaseous radioactive indium halides C. Ruth, M. Gründel, I. Eschrich, L. Ziegeler and I. Borchert	454
Analysis of polarization effects in time-dependent Rayleigh light scattering by optically active molecules K. Knast	465
Electric permittivity in the one- and two-phase region of 1-nitropropane–hexadecane near-critical solution M. Paluch, P. Habdas, S.J. Rzoska and T. Schimpel	483
